# DUAL PATTY V

DUAL PATTY V is a surgical compress designed to control intraoperative bleeding and absorb exudate.
It is a non-resorbable dressing made from a blend of mushroom-chitosan and cellulose, available in different sizes for delicate surgical procedures.
An X-ray detectable thread is integrated by default for added safety.

- Protects nerves and blood vessels during the surgical procedure
- Applied saline solution or produced exudate can be aspirated through the dressing
- Prevents re-release of absorbed blood to keep the surgical field clear during the procedure

## FEATURES AND BENEFITS

· Gauze ensuring a clear surgical field and nerve protection
· Excellent flexibility and good tissue conformability
· Excellent hemostatic effect
· Antimicrobial effect
· Easy to apply and remove
· Controls bleeding during the surgical procedure

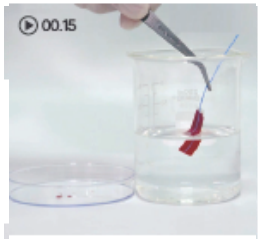

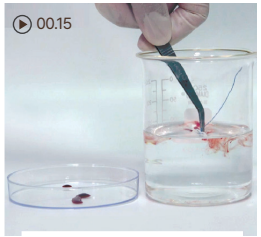

## CLINICAL TEST DATA

### Blood coagulation test

(After absorbing blood into a pad, immerse it in a saline solution)
Prevents re-release of absorbed blood to keep the surgical field clear during the procedure

### 1. Antimicrobial

99.9% antimicrobial effect thanks to KIOMER M3 fiber.

### 2. Soft, non-woven, super absorbent

High absorption capacity thanks to KIOMER M3 fiber and Comflex non-woven cellulose fiber technology.

### 3. Flexibility

Can be folded, shaped and freely conformed to tissue contours.

### 4. Thickness

Thickness level.
Normal type: 0.1 cm / Thin type: 0.05 cm

### 5. High strength

Tear-resistant even when wet.

### 6. Extended moisture retention

Retains fluid for a long time before drying or adhering.
